

Create anything

Cube[™] acoustic panels reject the restraints of traditional acoustic panels, offering versatility and creative freedom in place of dull conventionality. A blank canvas for customisation, Cube panels can be cut, moulded, printed, pressed, and grooved to create high-performance acoustic features for any interior space.

Made from 100% polyester fibre, Cube realises innovative design concepts without pomp or circumstance.

Cube panels are available in 12 mm and 24 mm thicknesses for application flexibility, and don't require edging or capping.

Applications

Decorative and functional acoustic treatment for interior spaces

Royal Commission,

Cube in Rosada, Flatiron, Empire and Savoye

Customisation

As creators and innovators, we understand your pursuit of the bold and unusual, the rare and exceptional—the brave, colour-outside-the-lines ideas. Every space you design is unique, therefore, every element—from floor to ceiling—should be tailored to fit. Our customisation tools offer unique avenues for creative expression to help you achieve your vision—all that's left to explore are the boundaries of your imagination.

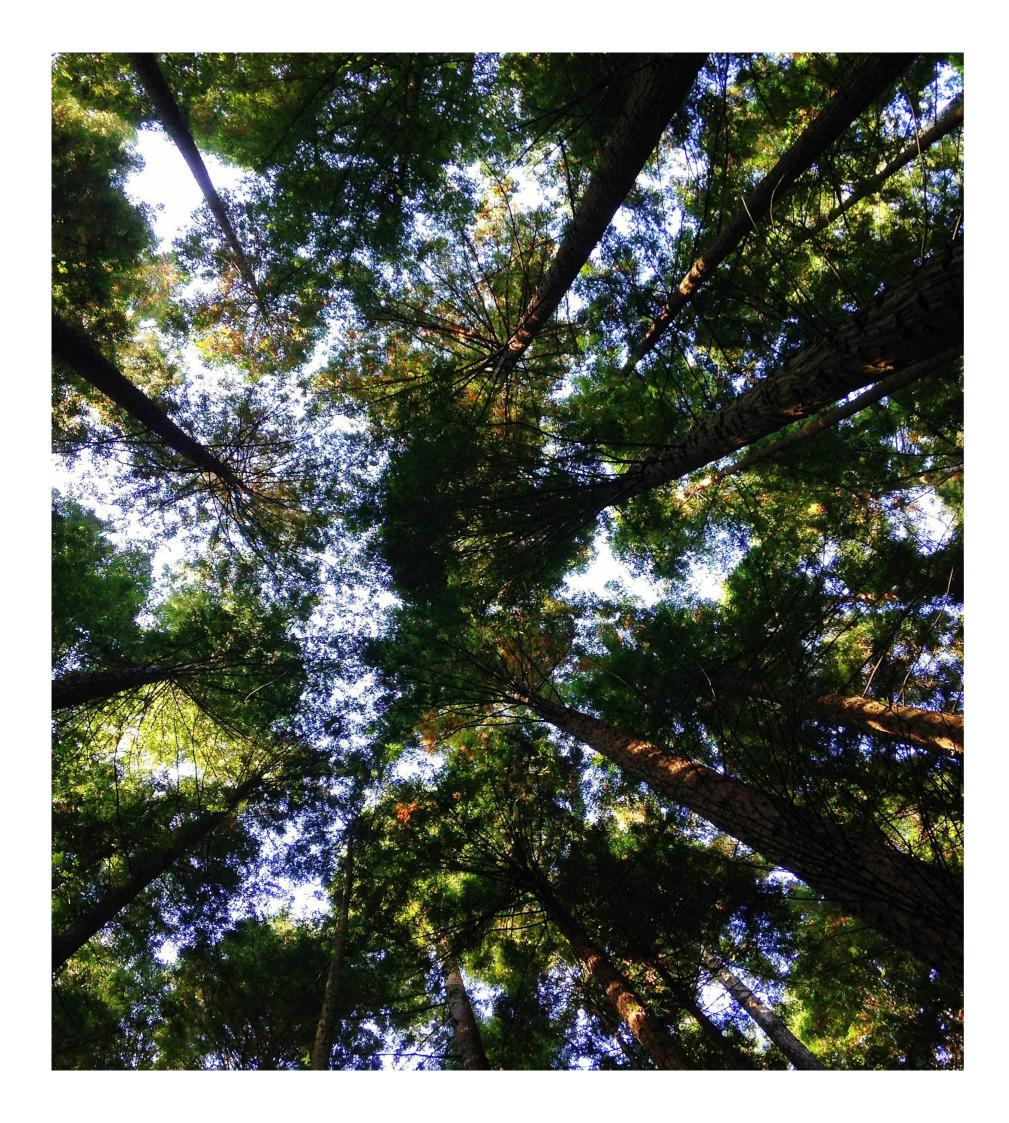

Our customisation capabilities include Print, Etch™, Groove, Precision Cut, Mould and Press, and Peel 'n' Stick.

Caring for the environment

Cube is manufactured using 100% polyester fibre and contains a minimum of 60% recycled fibre (from PET plastics). Our products are designed to be recycled at the end of their life too.

We have continual improvement programmes in which we implement a range of initiatives to mitigate the environmental 'hotspots' that we have identified. Our products are GreenRate Level A, Health Product Declaration (HPD), and CDHP Standard certified.

Cube is DeclareSM certified to be Red List free and can be used in Living Building Challenge projects. Autex has a high functioning Environmental Management System (ISO 14001) to enhance our environmental performance and contribute to sustainable development.
